Art Unit: 3751

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 4-7, 9, 26-31 and 33-37 are rejected under 35 U.S.C. 102(b) as being anticipated by Smith.

The Smith reference discloses a sink comprising: a top surface including a basin 20; an apron 10,22 including a hole (Fig. 5 at 14) and a recess (receiving 14,38); a panel 14,38 including a decoration (knobs); and a bolt (illustrated, Fig. 5) as claimed.

Applicant argues at pages 10-11 of the response filed November 20, 2006 the term "apron" recited in the claims has a special meaning which is not met by the Smith disclosure. The examiner can not agree. The term "apron" is not even found in

Art Unit: 3751

the original disclosure of the instant application. precludes any new meaning of the term which could alter claim scope beyond that which is supported by the original disclosure. At filing, the sink 10 was described simply as including "a front surface 12" (pg. 3 lns. 18-22), as illustrated in the drawing figure. Therefore, the term "apron" can not be (and is not) considered to differ in scope from this original definition. Clearly, the structure identified supra as equating to the claimed "apron" indeed does meet the structure defined by that term. Applicant argues at page 11 of the response the declaration of William McKeone provides "factual evidence" that the term "apron" has a special meaning to "a person of ordinary skill". The examiner can not agree. Initially, it is noted the declaration does not establish the relationship (business, disinterested, etc.) between the declarant and the inventive entity of the instant application. In any event, declarant McKeone bases his conclusions on an overly restrictive interpretation of the term "apron", rather than a reasonable interpretation of the claim language as informed by the application disclosure. declarant McKeone states the conclusions result from his understanding of "the disclosure of U.S. patent application Serial No. 10/820,3874" (sic 10/820,384), such conclusions appear inconsistent with the breadth of the original disclosure

Application/Control Number: 10/820,384

Art Unit: 3751

as noted supra. Further in this regard, even if the term "apron" was present in the original disclosure, the term should not be interpreted restrictively as noted in the paragraph bridging pages 6 and 7 of the instant specification.

Ultimately, the declaration fails to overcome the anticipation rejection.

- 3. Applicant is referred to MPEP 714.02 and 608.01(o) in responding to this Office action.
- 4. The grounds of rejection have been reconsidered in light of applicant's arguments, but are still deemed to be proper.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
